WHY SWINDON:

Swindon combines strong advanced-manufacturing capability with direct access to the M4 corridor, national supply chains and a growing defence and uncrewed-systems ecosystem. The presence of Army Headquarters, Air Command and DroneTEX creates valuable opportunities for collaboration, testing and rapid capability development. It also offers the skilled engineering base, industrial space and connectivity needed to scale production. For companies investing in defence technology and drone manufacture, Swindon provides a practical platform for growth in the UK.

Trading name	Expert Technologies Group
Swindon site	Defence engineering centre supporting drone production
Business Sector	Defence, aerospace, drone manufacturing and industrial automation
Location	Workshed, London Street, Swindon SN1 5DG
Contact Details	Email: dave.bartell@expertgroup.com Telephone: 02476 428 500
Business Information	Expert Technologies Group designs and delivers advanced manufacturing systems for complex, high-value products. For the defence sector, our focus includes the production engineering, tooling, automation, assembly, test and digital systems needed to manufacture uncrewed aerial systems at pace and to consistent quality. We help customers move from product design and prototype build into repeatable, scalable production, integrating equipment, data and technical support.

WHAT WE OFFER:

Expert Technologies Group has supported manufacturers in aerospace, automotive, electrification and other high-value sectors, helping them industrialise new products and improve existing production. Our teams bring together manufacturing engineering, tooling, robotic automation, digital simulation, assembly, inspection and test. For new investment in Swindon, we can provide practical support from early production planning and process validation through to equipment delivery, ramp-up and aftercare - helping drone and defence businesses establish robust, scalable UK manufacturing capability.

" Swindon offers the engineering capability, connectivity and emerging defence ecosystem needed to turn innovation into scalable production. Its growing concentration of uncrewed-systems expertise makes it a compelling base. "
David Bartell, Group Technology Director, Expert Technologies Group
